Learning Journal
Week 1

Student Name: Mahimur Rahman Khan

Student ID: 40271113

Course: SOEN 6841 - Software Project Management

Journal URL: https://github.com/mahimrahman/SOEN-6841-Software-Project-Management

Week 1: Jan 18 – Jan 24

Date: 24/01/2024

Key Concepts Learned:
Learnt about Project Management, Software Project Management, Difference between general project Management and Software Project management, Project Initiation.
New Concept learnt: Project Charter

Application in Real Projects:
If we can follow the ideal initiation and planning properly and can define the project charter perfectly it will reduce the risk factors and also will help achieve realistic goals.

Peer Interactions:
Tried to look for emails or contacts or group members but unfortunately was not able to do so. Will try to have a group discussion after this weeks class and start working on project.

Challenges Faced:
It was bit hard to complete the exercises. Because both the exercises needed some research an there was not a lot of data available. Specially on the govt tech investment and open source charter analysis.

Personal development activities:
Read the previous weeks chapters and also till now prepared chapter three.

Goals for the Next Week:
- Meet and have a discussion with project group members
- Start working on the market research
